

Congratulations on your decision to purchase a Redwood Krest puppy! You are purchasing a top quality, well bred, well socialized, mentally and physically sound puppy from the most successful show and working kennel in the USA. [We don't just say it, we prove it!!](#)

We have established the following process to make purchasing a puppy as simple as possible:

Step 1: Make a \$500 non-refundable deposit to get on our waiting list. In the event a suitable puppy is not available from the litter the deposit was intended for, this deposit is good for any mutually agreed upon future litter; credit towards the purchase of a youth or adult dog; or towards a stud fee to any male we own. This deposit does not expire, however puppy prices are subject to price increases.

Step 2: When the puppy is 6 weeks old, the remaining balance due must be paid in full and the completed sales contract must be returned to us.

Step 3: At 7 weeks of age we temperament test the litter and decide which homes will be the best match for each individual puppy. With our breeding experience, we feel we are most qualified to select the puppy for its new home. It is in our best interest to match up the best puppy with its new home, we want happy clients, happy puppies and repeat business! We are with the puppies constantly for the first 8 weeks of their life and know their personalities and temperaments better than anyone else. We've been selecting puppies for our clients for many years and have a 100% success rate.

Step 4: Between 7 1/2 and 8 weeks of age, the puppy will be vet checked and certified 100% healthy or it will not be sold. The puppies are wormed on a regular basis starting at 2 weeks of age and vaccinated prior to leaving for their new homes.

Step 5: At 8 weeks of age, puppy will be shipped out or if buyer prefers, picked up at our facility. At this time, AKC registration papers, vaccination record and general information on raising your puppy will be provided. Please note: We name our puppies as soon as they are born and AKC register them immediately so that we can provide the AKC registration certificate at time of sale.

We offer lifetime breeder support and are available to our clients 24/7. We care about where our puppies go and want to be updated on a regular basis on their progress. We can help with any training/behavioral issues, health concerns, nutritional questions, showing and breeding advice as well as any other questions/concerns that may arise. Our goal is to have long-term, happy clients!
